## Summary of findings:

### LIVER:

The organ is normal in size (11.7 cm) and regular in outline. **Hepatic parenchyma is homogeneous in echotexture with uniform & mildly echogenic.** No focal or diffuse lesion is seen. Portal vein, hepatic vein & their tributaries are normal. Porta-hepatis appears normal.

### BILIARY TREE:

No significant intra or extra hepatic biliary channel (CBD) dilatation or abnormality is noted. CBD is of normal caliber (3.6 mm).

### GALL BLADDER:

Normal in size (6.4 x 1.4) cm. Outline is uniform. Wall thickness is 2.0 mm. No abnormal echogenic structures, sludge or deposits are seen in Gall bladder lumen.

### PANCREAS:

Normal in size. Shape, position & echotexture of the organ is within normal limit. No pancreatic duct dilatation or abnormality is observed.

### SPLEEN:

Normal in size with uniform echopattern. Bipolar diameter of spleen is 9.4 cm. Splenic hilar vessels appear normal.

### KIDNEYS:

Both the kidneys are normal in size, shape and position with well-defined cortex and medulla. Right kidney is measuring about (10.1 x 4.8) cm and cortical thickness is about (1.0 cm). Left kidney is measuring about (10.9 x 4.8) cm and cortical thickness is about (1.4 cm). Cortical echogenicity, its thicknesses & cortico-medullary ratios are within normal limit in both the kidneys. Pelvicalyceal systems are not dilated. Both the perinephric spaces are clear.

Ambulance Service : 01917042946, 01682912304, E-mail : hitechmch164@gmail.com

## URINARY BLADDER:

Is well filled with urine. Wall thickness & outline is within normal limit. No irregularity, trabeculation, indentation or diverticulation is noted.

## UTERUS:

Anteverted & anteflexed uterus is elongated & bulky in size (L- 14.2 cm x AP- 4.4 cm x width- 5.6 cm) with homogeneous myometrial echotexture. Endometrial thickness is 10 mm. Cervix appear normal (AP-2.1 cm).

## ADNEXAE:

Both the ovaries and adnexal regions appear normal. Right ovary is measuring about (2.9 x 1.8) cm and left ovary is measuring about (3.1 x 1.6) cm. No evidence of tubal dilatation is seen on either side. No abnormal mass, cyst or fluid collection is seen in the pelvic cavity.

## OTHERS:

No Free fluid is noted in the pleural or peritoneal spaces.

No evident abdomino-pelvic lymph adenopathy is noted.

## Impression:

- Fatty change of liver (Grade-I).
- Elongated & bulky uterus.

## Cytopathology Report

Specimen Type: Four unstained slides of conventional paps smears.

### Microscopic Examianation

**Cellularity** : Smear celluler and adequate for evaluation.

**Epithelial cellular abnormality** : No dyskaryotic or malignant epithelial cells are seen.

**Squamous cell** : Smear show superficial and intermediate squamous epithelial cells having mild inflammatory changes.

**Glandular cell** : Absent

**Squamous metaplastic cels** : Absent.

**Infection (Specific)** : Absent

**Inflammatory cells**: The background contains few lymphocytes.

**Interpretation** : Negative for intraepithelial lesion or malignancy.
