3	Bagerhat	Chitalmari Upazilla Health Complex	chitalmari	30	1.5	3	Footing	3	RCC	Structural condition of main hospital building is at a moderate level. Structural defects have become visible in some areas of the building's column, beam & slab.	No file	Not Possible	Regular civil (plaster, paint sanitary work) & electrical maintenance works have been undertaken.	
4	Bagerhat	kachua Upazilla Health Complex	kachua	22	1.66	2	Footing	3	RCC		No file	Not Possible		In 1980, the facility had a total of 31 beds. Over time, due to natural causes, this number gradually decreased. Several beds became unusable because of deterioration, and some were rendered non-functional. As a result, the facility could no longer maintain the original capacity of 31 beds. In 2005, an additional 19 beds were added. These newly added beds were also incorporated into the national database. Among the 50 beds listed in the national database, 19 were newly added, while the remaining 31 had gradually become unusable over the years due to natural causes. Among the 19 newly added beds, 3 were designated for female patients. These 3 beds were included in the national database in alignment with the government's initiative to ensure dedicated facilities for women. Necessary government support and facilities were also allocated for these beds.
